Profile Summary

As an aspiring developer and coding enthusiast, I'm a goal-oriented engineering student seeking entry-level software development positions. I have a passion for problem-solving, effective communication, and teamwork, and I thrive in tackling complex tasks in a collaborative environment.

Experience

Prodigy InfoTech

May 2024 – June 2024

Intern

Remote

- Actively contributed to web design and development, proficient in HTML, CSS, and JavaScript.
- Implemented responsive, user-centric designs for optimal functionality and user experience.
- Collaborated with teams to deliver high-quality projects on time and continuously refined coding skills while staying updated with emerging technologies.

Codsoft

Jun 2024 – Jul 2024

Intern

Visakhapatnam

- Executed Java projects end-to-end, improving system reliability through detailed inspections and increasing data accuracy with observational strategies.
- Identified and resolved bugs, enhancing system functionality and streamlining testing processes with a team to reduce delivery time.
- Gained comprehensive understanding of JAVA applications through hands-on involvement.

Projects

Tic Tac Toe / Javascript, CSS, html

May 2024

- Developed an interactive and user-friendly Tic Tac Toe application focusing on essential arithmetic operations and a sleek user interface.
- Designed a responsive, intuitive Game application with a clear interface, ensuring compatibility across various devices, easy usability, and robust error handling for managing invalid inputs.
- Implemented comprehensive functionalities, including basic operations, memory functions and clear/reset features to facilitate new calculations efficiently.

Weather Forecast / javascript, html,css

June 2024

- Designed a responsive Weather app to enhance user engagement and experience.
- Optimized codebase for better performance and faster load times, and integrated secure weather gateway with OPEN-Source application to fetch weather status
- Implemented dynamic product recommendations and a user-friendly option to boost cross-selling and reduce and lag issues in it.

ATM Interface / Java / GitHub

July 2024

- Developed secure authentication endpoints for people to create an account with minimum deposit of 1000/-.
- Implemented user-friendly endpoints for execution with various sectors such as withdrawal, deposit, savings, account balance etc. .
- Improved patient data accuracy and reducing errors in the registration process.

Technical Skills

Languages: Java, HTML/CSS, JavaScript, Java

Developer Tools: VS Code

Databases: MongoDB, SQL

Frameworks: React, Bootstrap

Additional Skill: DSA, OOPS, DBMS

Soft Skills: Communication, Team Work, Problem Solving.

Education

Gitam University, Visakhapatnam

B.Tech in Computer Science Engineering

2022 – 2026
